

Company

RFIDea SA

Function

**.Net Developer - Experimented Project Leader (M/F)
(January 2012)**

Introduction

RFIDea SA, founded in January 2003, positions itself as a study office and an integrator specialized in advice; design and implementation of traceability solutions with a strong expertise in RFID. Based in Belgium, RFIDea was rapidly recognized as a reference in Europe through the quality of its advice and its efficiency in the implementation of traceability projects.

RFIDea has been integrated to Zetes Group in May 2011. The company is now in charge of the identification solutions based on RFID technology for the group.

For the past five years, RFIDea has successfully carried out multiple studies and pilots, and implemented projects including in rough industrial environments.

ZETES INDUSTRIES (Euronext Brussels: ZTS) is an important Pan-European company active in the sector of added value solutions and services of automatic goods and people identification (Goods ID and People ID).

Founded in 1984, the company, headquartered in Brussels, Belgium has grown through acquisitions. It owns subsidiaries in 15 countries (Germany, Belgium, Ivory Coast, France, Greece, Ireland, Israel, Italy, Netherland, Scandinavia, Portugal, Spain, Switzerland, United Kingdom and South Africa). Zetes counts currently +1,000 employees (FTE) and had a consolidated turnover of +200 million Euros in 2010.

Willing to continue its development, RFIDea SA is looking for a **.Net Developer - Experimented Project Leader (M/F)**.

Function description

In collaboration with the Technical Manager :

- You participate in the definition of the IT architectures and industrial techniques taking into account client's constraints.
- You manage two projects financed by the Walloon Region in the pharmaceutical and the luxury sectors (coordination of private and public partners to the project, definition of solutions, management of the development teams, reporting).
- You participate in some IT developments for given projects (partly or completely).

- You interface IT solutions with different reading equipments (RFID, barcode, external sensors...) using various protocols.
- You implement and maintain solutions sold to the client (mainly in Belgium and France, sometimes in the rest of Europe).
- You are interested in technological evolutions in our business to propose the best technical alternative to the client according to his needs and constraints.

Profile

You have an IT degree with industrial specialization.

You have an experience of +5 years in IT developments using C# and ASP .Net, SQL Server with ports notions and different exchange protocols with hardware equipments.

You have an experience of +3 years in project management with skills in team, clients and suppliers relationships management.

A Windows Mobile skill is a plus.
Experience in the pharmaceutical sector in a plus.

As you will evolve in an international context, you are fluent in English (spoken, read and written) and you agree to go on business trip on a sporadic basis. Dutch knowledge is a plus.

You live in Wallonia and are quickly available.

We offer

An attractive salary package combined with a company car.

Should you recognize yourself in this profile, do not hesitate to send your application.
Looking forward to hearing from you!
